

REMARKS

A Notice of Allowance was issued June 8, 2006 in the above-identified patent application. In lieu of paying the issue fee, applicants are filing the present amendment, together with a Request for Continued Examination pursuant to 37 CFR §1.114.

In accordance with the present amendment, the specification has been amended to update applicants' claim for benefit of their related U.S. Provisional patent applications, in the manner prescribed in 37 CFR §1.78(a).

This amendment also includes new claims 28-49, which are drawn to particular embodiments of applicants' invention. Support for new claims 28-49 is provided in the present specification, *inter alia*, at pages 20-22, and pages 81-84 (Example 43). Support is also provided by original claims 17-24.

Submitted herewith for consideration by the examiner in relation to the present specification amendment are copies of the official filing receipt, the title page and claim 1 from U.S. Provisional Patent Application No. 60/515,944, which clearly show the relationship between the present application and U.S. Provisional Patent Application No. 60/515,944.

No new matter has been introduced into this application by reason of the present amendment, entry of which is respectfully requested.

As the new claims cover particular embodiments of subject matter that has already been allowed, the issuance of a Notice of Allowance is believed to be in order, and such action is earnestly solicited.

Respectfully submitted,
DANN, DORFMAN, HERRELL & SKILLMAN

**LICENSE FOR FOREIGN FILING UNDER
Title 35, United States Code, Section 184
Title 37, Code of Federal Regulations, 5.11 & 5.15**

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Office of Export Administration, Department of Commerce (15 CFR 370.10 (j)); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).
